

Image 1: ETC Driver

- GPS 10Hz
- Serial communication: TDL 3.2 / MTD 2.4
- Plug and Play

General

The External Serial GPS enables the traditional GPS functions of the Pro Tune product line in the TDL 3.2 and MTD 2.4. It has a Mike 4V connector and is directly connected to the adapter harness provided with TDL 3.2 and MTD 2.4. In the case of the ECU, it is necessary to use the product in conjunction with the CAN-serial converter.
